4. SECTION 4: FIRST AID MEASURES

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

FlowTec

4.1	Description of first aid measures	
	Self-protection of the first aider	No action should be taken involving personal risk. Use personal protective equipment as required. Ensure adequate ventilation Avoid inhalation of dusts. Avoid contact with skin and eyes.
	Inhalation	IF INHALED: Remove person to fresh air and keep comfortable for breathing. In case of respiratory tract irritation, consult a physician.
	Skin contact	IF ON SKIN: Gently wash with plenty of soap and water. If irritation develops and persists, get medical attention.
	Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If possible, use isotonic water (0.9% NaCl). After rinsing affected eyes must be seen by an ophthalmologist. Do not rub eyes in order to avoid possible corneal damage by mechanical stress.
	Ingestion	IF SWALLOWED: Rinse mouth. Give plenty of water to drink. Do NOT induce vomiting. Seek medical treatment.
4.2	Most important symptoms and effects, both acute and delayed	May cause respiratory irritation. May cause an allergic skin reaction. Causes serious eye damage. May cause respiratory irritation. Handling of this material may generate a dust which can cause mechanical irritation of the eyes, skin nose and throat.
4.3	Indication of any immediate medical attention and special treatment needed	Treat symptomatically.
	Notes to a physician:	Treatment by an ophthalmologist due to possible caustic burn of the eyes may be required.
		Symptoms may be delayed for as long as 48 hours following exposure.
5.	SECTION 5: FIREFIGHTING MEASURES	
5.1	Extinguishing media	
	Suitable extinguishing media	Not flammable. In case of fire use extinguishing media appropriate to surrounding

Unsuitable extinguishing media 5.2 Special hazards arising from the substance or mixture 5.3 Advice for firefighters

Not flammable. In case of fire use extinguishing media appropriate to surrounding conditions. Water spray, foam, dry powder or CO2.

Do not use water jet. Direct water jet may spread the fire.

May give off noxious and toxic fumes in a fire. Combustion products: Carbon monoxide, Carbon dioxide, Nitrogen oxides (NOx), Metal oxides.

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid run off to waterways and sewers.

6. SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures	No action should be taken involving personal risk. Wear suitable protective clothing. Ensure adequate ventilation Avoid breathing dust Avoid contact with skin and eyes. Remove contaminated clothing and wash all affected areas with plenty of water. Take precautionary measures against static discharges.
6.2	Environmental precautions	Do not allow to enter drains, sewers or watercourses.
6.3	Methods and material for containment and cleaning up	Take up mechanically, placing in appropriate containers for disposal. A vacuum equipped with HEPA (high efficiency particulate air) filtration is recommended. Treat the recovered material as prescribed in the section on waste disposal.
6.4	Reference to other sections	See Also Section: 8, 13.

7. **SECTION 7: HANDLING AND STORAGE**

7.1 Precautions for safe handling

When using do not eat or drink. Wear suitable protective clothing. Provide adequate ventilation when using the material and follow the principles of good occupational hygiene to control personal exposures. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not eat, drink or smoke when using this product. Remove contaminated clothing and wash clothing before reuse. Avoid breathing dust. Avoid contact with skin and eyes. Avoid dust generation.

- 7.2 Conditions for safe storage, including any incompatibilities Storage temperature Incompatible materials
- 7.3 Specific end use(s)

Keep only in original packaging. Keep in a well ventilated place. Keep container closed. Take precautionary measures against static discharges. Ambient temperatures. When wet: Acids, ammonium salts, aluminium, copper and their alloys. See Section: 1.2

8. SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

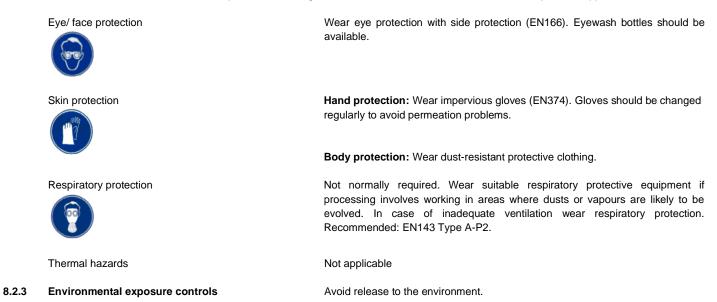

8.1.1 Occupational exposure limits

8.1.2	Biological limit value	Not established
8.1.3	PNECs and DNELs	Exposure scenarios for these substances are not yet available in the supply chain
8.2 8.2.1	Exposure controls Appropriate engineering controls	Provide adequate ventilation when using the material and follow the principles of good occupational hygiene to control personal exposures. Take action to prevent static discharges. Keep away from fire, sparks and heated surfaces. Avoid dust generation
8.2.2	Individual protection measures, such as personal protective equipment	Use personal protective equipment as required. Take care for general good hygiene and housekeeping. Avoid inhalation of vapours that may be evolved at elevated temperatures. Avoid breathing dust. Avoid contact with skin and eyes. Wash hands before breaks and after work. A washing facility/water for eye and skin cleaning purposes should be present.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

10. SECTION 10: STABILITY AND REACTIVITY

10.1	Reactivity	When mixed with water, cements will harden into a stable mass that is not reactive in normal environments
10.2	Chemical stability	Stable under normal conditions
10.3	Possibility of hazardous reactions	Dissolves in hydrofluoric acid to produce corrosive silicon tetrafluoride gas.
10.4	Conditions to avoid	Protect from direct sunlight. Avoid contact with moisture
10.5	Incompatible materials	Incompatible with acids, with ammonium salts and with aluminium, copper and their alloys.
10.6	Hazardous decomposition products	May give off noxious and toxic fumes in a fire. Combustion products: Carbon monoxide, Carbon dioxide
